

MATRAX GEL TRUCK

Description

Product for cleaning truck bodies.

Application

As it is a product that can be mixed with water, the percentage used will be up to the user.

However, we recommend that the dilution percentage be between 3% and 6%.

Apply the dilution directly by spraying it onto the surface to be cleaned.

Next, scrub with a brush or cloth, then rinse thoroughly with plenty of water to achieve a clean surface.

It is an alkaline solution (PH 12) and has a yellowish colour.

Technical characteristics

Environmentally friendly: as it contains no phosphates or aggressive chemicals

Material compatibility: there are no known adverse effects when in contact with common materials such as awnings, painted metals, labelling, aluminium, etc.

Approvals and Recommendations

All packaging must be stored in covered facilities. In cases where outdoor storage is unavoidable, the drums should be placed horizontally to prevent the possible infiltration of water, as well as their deformation. Products should not be stored above 60°C, exposed to direct sunlight or low temperatures. We advise you to read the safety data sheet carefully for more information on its use and handling.
