

MATRAX BRAKE FLUID DOT-4

Description

Fluid for use in all types of hydraulic brake and clutch systems requiring compliance with the DOT4 specification.

Application

Synthetic brake fluid with a high boiling point. Especially developed for use in all braking systems, particularly in environments subject to extreme conditions. It can be used in systems with and without ABS.

Technical characteristics

High boiling point: allowing for a safe use
Stable: compatible with the components that make up the brake circuits

Technical information

Parameter	MATRAX BRAKE FLUID DOT-4
Kinematic viscosity @100°C (cSt) ASTM D 445	>100
Density a 15°C (g/cm ³) ASTM D 1298	1,035
Brookfield viscosity @-40°C (cP) ASTM 2983	<1400
Appearance	Líquido amarelo transparente
Boiling point (°C)	>260
pH	7-11,5

Approvals and Recommendations

DOT-4 · UNE 26 106 · UNE 26 109 · SAE J-1703

All packaging must be stored in covered facilities. In cases where outdoor storage is unavoidable, the drums should be placed horizontally to prevent the possible infiltration of water, as well as their deformation. Products should not be stored above 60°C, exposed to direct sunlight or low temperatures. We advise you to read the safety data sheet carefully for more information on its use and handling.
