

# MATRAX LHM FLUID

## Description

Mineral-based hydraulic fluid for CITRÖEN hydropneumatic suspensions

## Application

Especially recommended for hydropneumatic suspension systems, brakes and centralised circuits of a number of older CITRÖEN vehicle models, as well as some ROLLS ROYCE and JAGUAR vehicles.

It should only be used on green-painted circuits.

## Technical characteristics

Low viscosity: to ensure suspension, power steering and braking functions at very low temperatures

## Technical information

Parameter	MATRAX LHM FLUID
Kinematic viscosity @40°C (cSt) ASTM D 445	5
Kinematic viscosity @100°C (cSt) ASTM D 445	>6,0
Flash point (°C) ASTM D 92	>110
Brookfield viscosity @-40°C (cP) ASTM 2983	<2000
Appearance	Fluido cor verde
Boiling point (°C)	>235
pH	7-11,5

## Approvals and Recommendations

UNE 26 090

All packaging must be stored in covered facilities. In cases where outdoor storage is unavoidable, the drums should be placed horizontally to prevent the possible infiltration of water, as well as their deformation. Products should not be stored above 60°C, exposed to direct sunlight or low temperatures. We advise you to read the safety data sheet carefully for more information on its use and handling.
