

## MATRAX TREFILAR

### Description

High-viscosity fluid suitable for drawing and extruding metal bars or tubes.

### Application

It is recommended as a lubricant for wire drawing operations and the extrusion of metal bars or tubes.

It can also be used in processes that require a lubricant with high viscosity and good chemical and thermal stability.

### Technical characteristics

Good lubricity: facilitates the movement of parts

Maximum resistance: to temperature variations

## MATRAX TREFILAR

### Technical information

Parameter	1
Kinematic viscosity @40°C (cSt) ASTM D 445	1000
Kinematic viscosity @100°C (cSt) ASTM D 445	53
Viscosity index ASTM D 2270	100
Density a 15°C (g/cm <sup>3</sup> ) ASTM D 1298	0,901
Flash point (°C) ASTM D 92	314
Freezing point (°C) ASTM D 97	-9

### Approvals and Recommendations

All packaging must be stored in covered facilities. In cases where outdoor storage is unavoidable, the drums should be placed horizontally to prevent the possible infiltration of water, as well as their deformation. Products should not be stored above 60°C, exposed to direct sunlight or low temperatures. We advise you to read the safety data sheet carefully for more information on its use and handling.
